

ACCESSORIES

MCC-05 – Inductive Sensor

The MCC-05 is a sensor that measures the inductive field around an electric cable and sends the reading to a connected Local Controller. This sensor is typically used in welding applications where it is positioned on the welding machines grounding cable.

LS-12 – Light Sensor

The LS-12 is a light sensor that senses variation of light and sends the reading to a connected Local Controller. This sensor is typically used in low amperage welding applications <30Amp or gas welding applications.

PC-500 – Pressure Switch (emergency exhaust systems)

The PC-500 is a sensitive pressure switch that is installed in the duct system and indicates the positive pressure when an engine starts up. The PC-500 will engage the ICE-LC to open the motordriven damper MD- or the fan controller (PCU-1000 or OS-) to start the local or central fan.

MSR-24/2 – Micro Switch

The MSR-24/2 is a micro switch that is installed on the exhaust hose reels SER, MHR or MER. When the hose is lowered the MSR-24/2 will activate the opening of a MD- damper directly, or via an ICE-LC controller for automation in a system, or to start a local or central fan via a SA-24 fan starter.

MD – Motorised Damper

The MD are motorised dampers in various sizes that is controlled by the Local Controller. 24VAC supply, 8 seconds opening/closing time.

	A
MD-6"	Ø150mm/6"
MD-160	Ø160mm/6,25"
MD-200	Ø200mm/7,85"
MD-315	Ø315mm/12,4"
MD-400	Ø400mm/15,75"

S-100 – Switch box

The S-100 is a switch box fitting EA, KUA, Flex-Max and MSA extraction arms. 2 switches for light and fan/damper control and 10m cable.

SK-300 – Switch box

The SK-300 is a switch box fitting LM-2 and UK telescopic extraction arms with the plastic hood collar. 2 switches for light and fan/damper control. 3m spiral cable.
