

## Magnetic Grabber®

The Magnetic Grabber® is designed and constructed to withstand the intense demand from the Emergency Service market. Constructed using only top grade metals of polished Stainless Steel to anticorrosive coated mild steel, while all plastic and rubber components are manufactured using certified recycled raw materials. The Magnetic Grabber® consists of two primary components, the Magnetic Hub and the 6.25"/160mm Reducer/Elbow. The 6.25"/160mm Reducer/Elbow is interchangeable to accommodate various size exhaust extraction hoses diameters (up to six inches). The technical data applied to the Magnetic Grabber® design are actual field recorded data and results through over twenty years of Emergency Service market experience.
